

## Silicone Spray

### Features:

- Optimal sliding and lubricating characteristics
- Prevents sticking
- Prevents wear and eliminates unpleasant squeaking noises
- Extremely good temperature resistance from  $-50^{\circ}\text{C}$  to  $+250^{\circ}\text{C}$ .
- Colourless, non-staining
- Especially user friendly and safe to use
- Good material compatibility
- Moisture repellent, protects rubber parts from frosting
- Very good care characteristics and permanent protection

### Operation Range:

As sliding fluid and lubricant for all moving parts in machines, especially for plastics, vehicle construction, and the print and paper industry.

As mould-separating agent in the plastic industry and for surface protection and care.

### Application:

Clean the surface to be treated if necessary. Spray evenly from a distance of app. 20 cm.

### Technical Data:

Colour	colourless
Odour	neutral
Density, 20 °C	0,748 g/cm <sup>3</sup>
Temperature range	-30 to +150 °C
Flash point	> 250 °C
