

**STRIPPER SPRAY****Features:**

The formulation is a suitable solvent for the powerful removal of cured adhesives, paints, paints, oil carbon residues, greases, oils, gaskets, resins, tar and bitumen from metal, ceramics, glass, PE, PP and wood. Unsuitable for 2-component paint systems and Japanese coatings. Before use, it is essential to check for suitability at a hidden point.

**Operation Range/ Application:**

Cover surfaces that are not to be treated carefully and cover. For best results use aerosol can at 15-25 ° C and shake vigorously before use. From approx. 20-30 cm away spray on the surfaces or residues to be removed. After a reaction time (swelling) of approx. 5 minutes, remove the removed material with a spatula or a clean cloth. If necessary, repeat the process. Be sure to wear work gloves and protective goggles and clean used tools immediately after use.
