

## WINCUT DRILLING CUTTING TAPPING OIL

### Features:

It is used in drilling, cutting and tapping operations in aluminum, stainless, black metal and all steels. It reduces the heat to be formed in the processes and prevents damaging of the tools and provides a very comfortable operation. Extends the service life of the drill and tap used.

### Operation Range:

Due to the high addition of additives, it is suitable for all types of hard steel, for cutting, thread cutting, thread cutting and broaching. Can also be used in rolling machines. It can be used in all metals except for the processing of yellow and copper metals.

### Technical data:

Appearance	Brown, clear
