

JTHWA-550 Hand Winch – Datasheet

General Description

The JTHWA-550 Hand Winch is a durable manual lifting and pulling solution designed for marine, industrial, and general-purpose applications. Equipped with a strong steel cable and safety hook, this compact hand winch offers reliable performance for controlled lifting and positioning tasks. The robust gear mechanism ensures smooth operation and long service life, making it suitable for demanding working environments.

Technical Specifications

Product Name	JTHWA-550 Hand Winch
Article Number	6105
IMPA Number	614913
Lifting Capacity	550 kg
Cable Length	6 meter
Operation	Manual hand crank
Hook	Safety hook included

Applications

This hand winch is ideal for lifting, pulling, securing loads, and positioning equipment. Commonly used in marine environments, workshops, trailers, warehouses, and maintenance operations.

Safety Instructions

Do not exceed the maximum lifting capacity of 550 kg. Ensure the winch is securely mounted before use. Inspect cable and hook regularly for wear or damage. Use appropriate personal protective equipment during operation.

Maintenance

Keep gears clean and lightly lubricated for optimal performance. Store the winch in a dry place when not in use. Replace damaged components immediately to maintain safe operation.
