

**C-Line Marine Dryer, 220V,  
50/60 Hz, Cap 8 kg**

Technical Parameter			
Product brand	IOCEAN	Product voltage	220V 50/60 Hz
Use type	Fully automatic	Drying capacity	8kg
Product power	2450W	Motor type	Fixed frequency
Drainage method	No	Inner barrel material	stainless steel
Control method	Computer type	Product color	Silver grey
Product Weight	33kg	Product gross weight	38kg
Product Size	600*660*870mm	Package Size	650*720*920mm

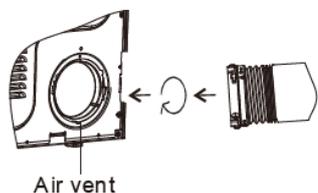

**Type: Vented Dryer**

Vented dryers heat up air and pass it into the drum. Once the hot air has become too moist to dry any further, it's vented out of the drum and replaced with new, dry air.

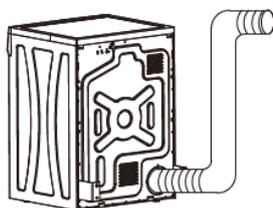

**AIR OUTLET PIPE INSTALLATION**

- Align one end of the threaded nozzle with the air outlet on the back of the dryer, insert it, and then screw it clockwise. Move the other end of the exhaust pipe to one side (2), or extend from the window or wall opening to the outside. Install correctly, as shown in (3).
