

Corrosion Protection Spray

Features:

- This spray prevents rust and corrosion on all ferrous and non-ferrous metals during storage, production and transport.
- Removes and eliminates moisture.
- Penetrates and lubricates.
- Protects against corrosion.
- Loosens rusted and frozen parts.

Uses:

Used for processed surfaces of machines, matrixes, installations, molds, pipe systems, casting parts, shafts, gears, ball bearings, shanks, locks, wires etc.

Application:

Apply an even layer. Repeat if necessary. Use the extension pipe for hard-to-reach areas.

Technical data:

Colour	colourless
Odour	characteristic
Density @20°C	~ 0,80 g/cm ³
Flash point	> 65°C
Pour point	-12°C
Dynamic Viscosity, 40°C	15 mPa s

ART. NO.
W160 117

Packaging:
500 ml SPRAY
