

# Pneumatic Oil Transfer Pump

## Features

- Can be inserted into most barrels.
- Will operate over a range of air inlet pressures.

## Applications

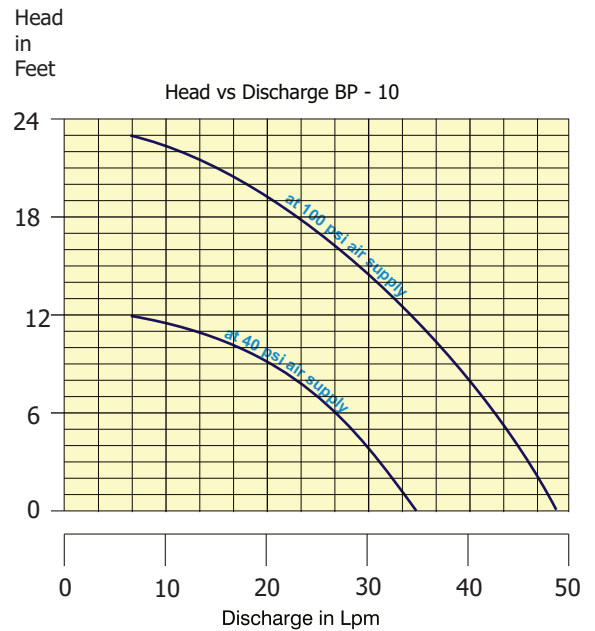

These barrel pumps are ideally suited for transferring light oils from barrels. They can be directly inserted into a barrel and screwed onto the bung by means of the provided adaptor.

## Technical Specifications

Model No: BP10  
Weight: 5.3 kgs  
Tube dia: 55 mm  
Air consumption: 15 cfm  
Air Inlet connector: Rc 1/4 inch  
Fluid outlet connector: Rc 3/4 inch

## Standard Equipment

Brass Bung Adaptor

Model BP10, Oil Transfer Pump
