

CHAIN AND ROPE CARE SPRAY

Features:

CHAIN AND ROPE CARE SPRAY for extreme conditions is a transparent, great adheres long-term lubricant for many industrial applications in the temperature range of -30°C to $+ 200^{\circ}\text{C}$. The lubricant is transparent and largely invisible. By optimum penetration (very low viscosity when applied) also reaches inaccessible places. After evaporation of the solvent, a well-adhering lubricant film remains. CHAIN AND ROPE CARE SPRAY for extreme conditions has good penetration and forms a very resistant protective layer, for high loads, for all weather conditions with a "WASH OFF" effect.

- ✓ Prevents seizing, sticking, rusting and gumming
- ✓ Water resistant

Application area:

- Versatile application at ropes, spindles, cylinders used in many industrial sectors
- In the automotive sector for the clutch and brake linkage, joints, door hangers and hinges, struts, locks, heating cables and valves, pedals, sunroof and seat tracks, cables, telescopic antennas, etc.

Application:

The surface should be dust-free, old lubricant residues should be removed. Shake can vigorously (at least 2 minutes). Spray distance from 20 - 30 cm.

Technical data:

Colour	colourless
Odour	characteristic
Density, at 20°C	$0,83 \text{ g/cm}^3$
Temperature range	-30°C to $+ 200^{\circ}\text{C}$
Storage & Durability	-5 to $+30^{\circ}\text{C}$, 24 months

Art. Nr.:
W 160 115

Packaging:
400 ML SPRAY
