

COPPER SPRAY

PROPERTIES:

- Weather resistant
- Forms a continuous and water-insoluble protection layer
- Provides protection in damaged areas
- Abrasion resistant
- Heavy duty
- Quick drying

AREA OF USE:

- Used for repairing broken copper parts
- Reliably protects against the elements
- Effective coating for all metal parts and other materials

APPLICATION:

- The can should be at room temperature and should only be sprayed in a well-ventilated room. Before each spraying, shake well for about 2 minutes until the marble moves freely. A spray and material compatibility test on a similar surface is recommended.
- Clean from rust and grease, apply at a distance of 25 - 30 cm. For multiple coats, allow 5 minutes for each drying time.

TECHNICAL INFORMATION:

Color	Copper
Odor	Solvent like
Steam Pressure	3.8 bar 20°C
Steam Pressure at 50 C	6.5 bar
Log Kow	0.68 - 1.09

ART. NR.
W 140 442

Packaging:
400 ML
