

## LITHIUM WHITE GREASE SPRAY

### Features:

LITHIUM WHITE GREASE SPRAY is a multipurpose spray grease for highly stressed parts. Due to additives that reduce wear and protect against corrosion, a temperature stability of -20°C to +150°C is achieved in conjunction with a long service life.

- High adhesion and therefore good long-term effect
- With anti-corrosive additives
- Good thermal stability
- Protects against oxidation and corrosion
- Also suitable for gears
- Prevents seizing, sticking, rusting, cold welding and stick-slip effect
- With PTFE components

### Operation Range:

- For the long-term lubrication of rods and gearwheels
- Roller and ball bearings
- Hinges and guides
- All kinds of joints and couplings

### Application:

Surface preparation:

The surface should be dry, dust-free, old grease residues should be removed.

Shake the can strongly (approx. 2 minutes). Spray from a distance of 20 - 30 cm. storage temperature of -5 °C to +30 °C.
