

WW 3000 LIQUID GREASE SPRAY

Features:

Semi-synthetic EP-resistant long-life adhesive grease. Lubricates parts working under extreme and shock loads and vibrations. Quick evaporation of solvent, therefore immediately strong adhesion to metal.

- Silicon, resin and acid-free
- High pressure and temperature resistance
- Spray and salt-water resistant adhesive lubricant
- Strong adhesion ensures good stability against all external influences
- Penetrates even into hard-to-reach places
- High dampening properties
- Safe lubrication thanks to use of state-of-the-art wear-resistant additives

Operation Range:

- Safe lubrication with every inspection such as door hinges or arrester straps
- When repairing struts, stabilizers, deflection levers, axle joints, gear-, clutch- and brake rods
- Corrosion protection for brake or fuel pipes

Application:

Thoroughly clean parts. Shake can well before use. Spray onto point of lubrication, leave to work for a short period, then spray again.

Technical Data:

Colour	yellow
Viscosity (40°C)	1600 cSt
Density at 20°C	0,765 g/cm ³
Wear factor DIN 51834	< 200
Temperature range	-30 +150°C
Flow time (4mm Ford beaker, 25°C)	12 s

ART. NO.
W 160 114

PACKAGING:
500 ML
