

Hand Cleaning Cream

Features:

- A freshly scented hand cleaner for everyday use. The hand cleaner is solvent-free and does not dry out the hands, even with frequent use. The product is intensively cleansed by a proportion of pumice granules whose structure is designed so that no skin irritation can occur. After use, a pleasant orange smell remains on the skin. Is used to remove normal and medium soiling such as oil, grease, diesel and industrial dirt from the hands. The hand cleaner is also used in household and hobby.
- The contained fine abrasives provide a deep pore cleansing and are gentle. Highly effective, deep-acting, moisturizing, economical and biodegradable.

Operation Range:

- It is a general-purpose hand cleaner for normal and medium-level dirt in the industrial sector.
- Recommended applications; Resins, oil, grease, tar, soot, earth, printer ink, paint, rubber cement, gasket and tile adhesive.

Application:

- Rub the Hand Cleaning Cream with dry hands, add some water and rinse thoroughly. The components of the Hand Cleaning Cream are completely biodegradable, will be completely dissolved and therefore will not clog the drainage and the pipes.
